THE PROBLEM

The gaming world is evolving with the adoption of blockchain technology. Traditional AAA gaming has yet to fully embrace the blockchain but still attracts the vast majority of players and dollar spend. Blockchain gaming development is on the rise but lacks the same level of user attention / retention. It is segmented between many separate projects where holders must buy game-specific cryptocurrency tokens in order to interact with the in-game economy. Play to Earn gaming in its current iteration is inherently flawed. It's largely unsustainable, either requiring a constant stream of ever increasing new users and/or is inflationary by nature. Many projects are constantly issuing new tokens to players and causing the dilution of the circulating supply's dollar value and therefore the earnings of the players. Blockchain gaming databases and marketplaces are few and far between. These platforms lack the player base and eyeballs required to truly bring blockchain gaming to the forefront. In a world where a handful of AAA games dominate the conversation, how can web3 games and developers get the attention this sector deserves?

ENTER DUBBZ

Dubbz is the merging of traditional and web3 gaming... a bridge and accelerator to blockchain-based gaming. Dubbz brings blockchain-based wagering to AAA titles such as Call of Duty, FIFA, Fortnite, and more. 24/7 available referees and player recordings ensure that cheating has no place on the Dubbz platform. The Dubbz web3 gaming marketplace will merge traditional AAA titles and blockchain-based games into the same platform and give blockchain games the closer to even playing field it needs to help drive adoption. Traditional gamers without exposure to Web3.0 and cryptocurrency will feel comfortable using Dubbz, there is no overwhelming interface or force feeding of web3.0 to alienate traditional gamers. Dubbz will provide a platform for game developers to list their blockchain-based games free of charge on our marketplace. The Dubbz team will work with game developers to integrate our dAPP into their game and provide monetization and exposure to their product. Players will be able to use their existing Dubbz balance in-game, eliminating the need for a player to have a separate token for each title. Sustainability is the essence of Dubbz and monetization methods will be rooted in player vs. player wagering... no token dilution or the need to constantly bring a fresh influx of players to keep the earnings valuable. The message from Dubbz to web3 game developers is simple.... "Build a good game... and Dubbz will take care of the rest."

FEATURES OF THE DUBBZ PLATFORM

1. GAME WAGERING
2. A SOCIAL HUB FOR ALL THINGS GAMING
3. BLOCKCHAIN GAMING PORTAL INTEGRATION.
4. REWARDING THE PLAYERS:
DUBBZ DIVIDENDS SYSTEM & REFERRAL INCENTIVES

1. GAME WAGERING

WAGERING & MATCHMAKING

Users seek matches via the Dubbz-hosted matchmaking service, where available opponents are located based on criteria such as their region, the selected game, and wager amounts. An ELO rating system will further assist in matching suitable players based on their relative skill levels to ensure competitions are as equal as possible.

Before beginning the match, the desired amount of USDC to be wagered is withdrawn from each player's balance. Wagers are placed with the polygon version of USDC for all matches on Dubbz. For users that are not using the web3 dAPP but instead the native Dubbz wallet they have deposited to, Dubbz will pull the balance from their account and wager USDC on the blockchain on their behalf. Once the match has ended, a winner is then determined and the pooled winnings, minus a minimal Dubbz platform fee, are distributed to the victorious player. If users wish to challenge opponents directly they can do so, skipping the matchmaking system.

In addition to 1vs1 matchmaking, tournaments will also be available. Whether competing in paid or free modes, gamers will still be vying for monetary prizes in both. Similar to the 1vs1 wagering, users will compete against one another in a bracket system for an accumulated prize pool. Tournaments will be hosted frequently with varying degrees of entry fees, skill levels, and prizes. Co-branded tournaments will also be hosted with differing brands and companies having the opportunity to host tournaments and gain marketing exposure.

THE DUBBZ PLATFORM GAMING CATALOG

With a catalog that will consistently expand over time, wagering will initially be facilitated for matches on the following triple-A games, which will be followed by the later addition of blockchain games and other triple-A games:

FIFA	Fortnite
Madden	Hearthstone
NBA 2k	League of Legends
Call of Duty: Vanguard	CS: GO
CoD: Warzone 2.0	Cod: MWII

SAFETY & SECURITY

Security is of utmost importance which is why Dubbz employs 24/7 trained referees to monitor games and support tickets. If participants experience any in-game issues like setting up the match, a chat will be available for them to seek assistance. If a participant suspects any kind of interference or foul play such as botting or any manner of cheating then this will be investigated and handled by the Dubbz dispute system. Dubbz has implemented a robust security protocol to safeguard its community and allow users to wager with peace of mind. A 24-hour holding period on the release of prize money is in place, allowing for the revision of match recordings in the case of a dispute. Matchmaking services will be secure and as fair as possible, with the majority of matches being recorded, excluding the likes of League of Legends and Hearthstone, where cheating is near non-existent.

PARTICIPATING IN THE DUBBZ WAGERING ECOSYSTEM

Participating in the Dubbz wagering ecosystem can be done in two ways:

1. BY CONNECTING A WEB3 WALLET (ON THE POLYGON NETWORK) CONTAINING USDC.
2. DEPOSITING TO AND WITHDRAWING FROM YOUR DUBBZ WALLET BALANCE VIA PAYPAL OR CIRCLE.

- For users with a self custody wallet, when a match is found, users send their desired wager amount to a smart contract. When a winner has been determined, the smart contract distributes the funds to the winner's wallet. In the case of a dispute, the funds will stay in the contract until a referee can determine the result.

- Users utilizing the fiat option works similarly with the Dubbz platform managing the underlying USDC on behalf of these users. Users will also be able to withdraw funds from the platform through PayPal / Circle as they see fit.

DUBBZ PRO MEMBERSHIP

Users can benefit from a Dubbz Pro Membership if holding the qualifying amount of Dubbz tokens. Perks of this membership include:

- **50% reduced match fees.**
- **Access to exclusive tournaments and events.**
- **Early access to new games and feature launches.**
- **Access to the community Trello board to help guide new feature development.**
- **Access to the community Snapshot to help guide new feature development.**

2. A SOCIAL HUB FOR ALL THINGS GAMING

The Dubbz Platform goes far beyond in-game wagering. With social features including Chats, Friend Requests, Leaderboards, Game Statistics and more, the Dubbz Social hub strives to become as vibrant and huge a community as the likes of PlayStation Network and Xbox Live, but with far more benefits to its user base.

Dubbz will be a fully-fledged social experience, geared towards interaction, competition and having a serious amount of fun, making Dubbz a cherished destination rather than a mere service. Want to tune into a tournament with a huge cash prize that's generating lots of hype? Thanks to the Dubbz live streaming feature, you and thousands of other spectators can partake in the excitement together and support the competitors with interactive, streamable tournament matches.

AVATARS & NFTS

In advance of the platform launch, Dubbz has partnered with ReadyPlayerMe, which will further fuel the social aspect of the platform. This ReadyPlayerMe collaboration allows players to create their very own avatars that will be used to navigate the platform. Although not NFTs themselves, every aspect of the avatar can be equipped with NFT attributes, meaning they can be fully customised into the kind of representation that a player desires.

Think of the possibilities- after winning a special tournament, you could win a cash prize, or, be rewarded a super rare, 1/1 NFT attribute that can be showcased using your Avatar, meaning that everyone you interact with would know of your gaming prowess and the tournament that you won. By tapping into the dynamics of social capital, these kinds of NFT attributes and prizes will bring huge value and bragging rights.

For tournament prizes, specific ReadyPlayerMe attributes in addition to cash prizes can be rewarded. These items could have specific benefits in games or on the Dubbz platform. (Reduced Match Fees, Exclusive Tournaments, etc.) The uniqueness and applicability of these NFT's will have real platform value for users of the Dubbz platform and therefore real monetary value.

3. BLOCKCHAIN GAMING PORTAL INTEGRATION

Onboarding Developers & Content

Dubbz users will be able to jump in and out of games with the click of a button in their browser. They can use their existing Dubbz USDC balance... no need to buy a separate token or pay token taxes to try out some game. With our ReadyPlayerMe partnership your Dubbz avatar will even be your playable character in many of the games on the portal.

If you're a blockchain game developer there's no need to spend on marketing, community building, or rely on taxes to stay afloat. With Dubbz you'll be immediately introduced to an active player base ready to wager real money on your game. No unsustainable P2E ponzinomics but real sustainable PVP wagers and tournaments. There will be no charge for developers to add their games to the portal. We'll only make money if you do when we drive players and wagers to your game. Its not just the relatively small blockchain gaming world that will now become aware of your game now but traditional AAA gamers playing games like Fifa or Call of Duty on Dubbz as well. Equal platform and exposure.

4. REWARDING THE PLAYERS: DUBBZ DIVIDENDS SYSTEM & REFERRAL INCENTIVES

Think that all the above has already set Dubbz ahead of the pack? Here's the icing on the cake—there are a multitude of ways that holders can receive constant revenue from the platform's operations, all of which are independent of trading volume.

DUBBZ DIVIDENDS SYSTEM

Presenting the Dubbz Dividends System (DDS), a first-of-its-kind revenue distribution system built with the Dubbz token holders firmly in mind. Independent of trading volume, these are real user rewards.

Thanks to the DDS, holders of the native DUBBZ token earn a percentage of revenue generated by the Dubbz platform in the form of USDC on Polygon. All wagers and dividends are recorded and verifiable on the blockchain, even wagers placed by players using fiat.

The number of dividends earned is determined relative to the size of one's token holdings. The impressive thing about the Dubbz Dividends System is that no staking or lock-up period is necessary, holders can simply claim the generated USDC through a dApp on the Dubbz Platform. What's more is that even if a former holder decides to sell their Dubbz holdings, the USDC they earned during their hold period will still be distributed to them without penalty.

But there's more.

DUBBZ LIFETIME REFERRAL PROGRAMME

All Dubbz Platform members will have a referral link. For each and every user that joins and wagers on the platform through this referral link, they will receive 1% of all the new user's wagers for life. This percentage applies solely to transactions made on the platform itself and does not include any Dubbz token purchases.

This affiliate program is one of the manners in which Dubbz will drive initial adoption, and anticipate it will take off like wildfire. For Youtube and Twitch Streamers, to Key Opinion Leaders (KOLs), the 1% lifetime percentage acts as a royalty percentage for existing users to onboard their viewers and communities. For the casual user, this is the Dubbz team providing yet another stream of income.

Referral links will eventually be embedded whenever users share clips of their gameplay on their social channels. The virality potential present is undeniable, with friends sharing clips of their proudest gaming moments, alongside the Dubbz Platform referral link.

LEVERAGING THE COMMUNITY

The genius behind both these incentives is that they're both utterly independent of volume. Platform adoption results in holders accruing dividends, irrespective of how the underlying Dubbz asset is performing or the current macroeconomic outlook.

Holders who do not even wish to engage in the gaming platform or partake in wagering still remain incentivized to carry out customer advocacy thanks to both the incentivised referral system and the dividend distribution system that are at work within the Dubbz ecosystem.

INNER WORKINGS OF THE DUBBZ PLATFORM

-
1. THE TECHNOLOGY BEHIND THE WAGERING
 2. DUBBZ PLATFORM'S REVENUE STREAMS
 3. LEGALITIES

1. THE TECHNOLOGY BEHIND THE WAGERING

The Dubbz platform will initially operate on two different levels of automation.

1. When Dubbz has access to a game's API, such as CS:GO, or the game in question is a blockchain game, then the wagering process is completely automated.
2. In games where the Dubbz Platform neither has OCR technology employed nor access to the game's API, wagering players report back to Dubbz with details regarding who won which is then verified by the referee team. As the games are recorded, there will be no manner in which people can game this system.

In the future, Dubbz will deploy a mechanism, slotting in between the two aforementioned levels of automation.

3. With games streaming through Twitch, a bot employing OCR technology will monitor the stream. OCR is the middle-ground between fully automated API access and hands-on human involvement. The bot identifies different key points of data such as who won, the statistics and breakdown of the game, alongside automated score reporting which allows it to determine the winner and distribute the winnings accordingly.

2. THE DUBBZ PLATFORM'S REVENUE STREAMS

Moving beyond the conventional dependency most cryptocurrency projects have on their native asset's trading volume, Dubbz has constructed a plethora of revenue streams that will aid its growth and further development in the future to come. Although operating and development expenses will be partially covered with the aid of fees siphoned from trading volume, the long-term objective is to reduce this transaction tax to close to zero in due course, with sole revenue dependence stemming from the platform's own performance. The following mechanisms will be in motion from launch:

- **Wagering**

Wagering will act as the primary form of monetization upon the launch of the Dubbz platform, with each player contributing a platform fee in order to wager against opponents.

- **Tournaments**

By facilitating gaming tournaments, Dubbz will keep a percentage of the prize pool.

- **NFT Avatars**

Monetization will stem from users purchasing assets in order to customise their on-platform avatars. Revenue will be split between the Dubbz platform and the platform's avatar system ReadyPlayerMe.

- **The Native Dubbz token's Operations Tax**

4% on every purchase and 6% on every sale of the underlying Dubbz asset will fund the Operations wallet.

- **Co-branding Platform**

A huge volume of visitors to the Dubbz platform will make it a thriving centre of convergence, and in turn, an extremely valuable tool in driving exposure for brands and projects. Esport teams, gamer-centric brands, energy drink companies, and cryptocurrency projects will flock to promote on the platform via co-branded tournaments, merchandise placements, and more. Alternatively, blockchain companies will be able to sponsor tournament pool prizes with their native token and provide payment to Dubbz, in return receiving massive exposure to a thriving blockchain-native community of gamers and investors.

FUTURE REVENUE STREAMS OF THE DUBBZ PLATFORM

Additional revenue streams, including a Play-2-Earn Marketplace, Stake-able Gaming Tournaments, and an expanded Dubbz dApp are envisioned for the future.

- **The Dubbz Blockchain Gaming Portal: an all-in-one Marketplace**

The upcoming Dubbz Gaming Portal will provide blockchain-centric game developers access to the benefits of the Dubbz platform and its integrated monetisation mechanisms. All types of blockchain game developers will be catered to and supported. Developers can incorporate the Dubbz dApp in-game, aiding them in driving monetisation through player vs player competitions, tournaments, co-branding opportunities and more. In exchange for a reasonable portion of the generated revenue, games will be listed for free on the Dubbz platform, providing invaluable exposure to a thriving hub of adventurous gamers.

This unique kind of support and integration facilitated by the Dubbz Portal will empower developers to focus solely on their development of a viable, high-quality game, without having to burden themselves with aspects already covered by the Portal. The Play-2-Earn space, although filled with potential, is still undeniably flawed, with very few projects, if any, having created a sustainable and profitable game for players. Dubbz believes that its Gaming Portal will play a role in the P2E space's advancement.

- **Further expansion of the Dubbz dApp**

The Dubbz dApp will eventually act as the tool of monetization for Web3.0-oriented game developers, thanks to the degree of integration and monetization streams that the platform will offer. Possibilities include integrating wagering components in-game, or the adoption of the native DUBBZ token in-game and not just on the Dubbz platform within which the game is available. This would provide a truly flawless experience for gamers with symmetry between game and platform. Revenue distribution of such a system will be dependent on the level of platform-game integration.

3. LEGALITIES

Regulations surrounding the industry made it paramount for the Dubbz team to obtain solid legal counsel on the legality of the platform due to the in-game wagering elements at play. Legislation and terminology setting out the definitions of gambling have been thoroughly explored thanks to ongoing legal consultation with a top law firm. Wagering upon oneself in-game, as the Dubbz platform so permits, is widely considered skill-based wagering (due to how much the outcome is reliant upon skill and not chance) and as a result, does not fall within the realm of gambling.

With assistance from the legal opinion letters obtained, Dubbz has been structured in an +18 manner that allows players to enjoy all the benefits of in-game wagering while maintaining full compliance with the relevant EU and US-based legislation. Some exceptions exist, and so, in adherence to individual State legislation, there are certain jurisdictions in the United States of America where Dubbz will not be accessible. Aside from these restricted areas, the Dubbz platform will be accessible all across the USA with more supported countries constantly being added.

THE NATIVE DUBBZ TOKEN

**THE NATIVE DUBBZ TOKEN HOLDS A KEY ROLE
WITHIN THE DUBBZ ECOSYSTEM.**

The Dubbz Dividend System provides all holders of the token with direct access to platform revenue, alongside platform fee discounts and additional benefits through the Dubbz Pro Membership, making holding the DUBBZ token an enticing opportunity for all.

-
- 1. TOKEN DETAILS**
 - 2. LAUNCH TYPE**
 - 3. PROJECT FUNDING**

1. TOKEN DETAILS

TICKER

DUBBZ

TRANSACTION TAXES

BUY 7% total acquisition tax.
3% to Liquidity, 4% to Operations.

SELL 7% total disposal tax.
1% to Liquidity, 6% to Operations.

*Operations Tax (project development & marketing).

Implemented to directly fund the ongoing expansion, maintenance and development of the Dubbz platform and its ever-expanding ecosystem. It also enables continuous promotion of the project.

*Liquidity Tax.

Implemented to reduce price volatility, incrementally increase the floor price and allow for large investors to enter.

TOKEN SUPPLY DISTRIBUTION

TOTAL SUPPLY 10,000,000 in total, split between Polygon and Ethereum

- Team: 15%
- Liquidity: \$50.000 USD
- Centralised Exchange (CEX) Listings

2. LAUNCH TYPE

The iOS + Android + Web version of the Dubbz platform will launch simultaneously with the launch of the token. The token launch will take place at the same time on the Ethereum and Polygon networks. There will be a cross chain bridge to connect the two chains where users can transfer their Dubbz tokens from one chain to the other. This will lead to arbitrage opportunities and keep the price relatively stable between the two networks.

3. PROJECT FUNDING

The entire seven-figure build that Dubbz required has been self-funded, drawing upon no seed round, no friends & family round, no private and no public sale rounds, nor has any venture capital funding been accepted. The Liquidity Pool on both the Polygon and Ethereum networks has been provided by the team. The goal of this is to even the playing field for all investors with no upper hand given to insiders or friends / family.

DUBBZ TEAM SECTION

-
1. FOUNDERS
 2. DEVELOPERS

1. FOUNDERS

FOUNDER PROFILE

KYLE MCCONNELL

Globe trotter. Serial Entrepreneur. Advocate for fairness within Web 3.0.

Known to much of the cryptocurrency community under the formidable alias of Kkon, Kyle McConnell might have made his name in the Web3.0 space, and yet, it's not the only place where his entrepreneurial origin lies. A serial entrepreneur from a young age, a breadth of experience ranging from aspiring teenage hustler flipping old school textbooks to high-end affiliate marketing businesses and venture capital have all played a role in Kyle's journey to where he stands today.

FOUNDER PROFILE**KEVIN WEBSTER**

The dark horse of the two Dubbz Founders, Kevin has a background in finance at a top investment bank which he ultimately abandoned for the tech industry because he didn't like having to wear suits. Prior to departing the conventional realms of finance for the Wild West that is Web3.0, it was in finance, through automation, that he learnt foundational programming skills that would later serve him in their application to blockchain technology. Searching for something more than a stationary lifestyle, he made programming his full-time endeavour to satisfy a desire to travel the globe and a passion to speak a host of different languages. In spite of his nomadic lifestyle and cryptocurrency success, Kevin still maintains that his favourite job ever was driving delivery vans around the Bronx. The two Founders, Kevin and Kyle, were once best friends separated by circumstance during university years, only to be reunited by a chance encounter some years later, which then saw them rekindle their brotherhood while travelling and pursuing countless business ventures together.

2. DEVELOPERS

DUBBZ DEVELOPER PROFILE

LAUTARO NAVARRO

Full Argentinian from the wine region of Mendoza. Having studied Systems Analysis & Programming, Lautaro is a true full-stack developer, operating from Photoshop to AWS. Apart from identifying as a Linux and open source software enthusiast, Lautaro is an avid music and photography lover, an occasional videogame enjoyer, and a fearsome volleyball player.

DUBBZ DEVELOPER PROFILE

SIMÓN GOMEZ

Half Spanish, half Argentinian, Simón studied electronics but switched to software after burning out some circuits. He has since been involved in software development for the past 13 years but this is no match for the 20 years of hardcore gaming experience he holds under his belt. Simón's favourite video games are Counter Strike, Dota 2 & Hearthstone, but he also loves role playing games in irl and is a Dungeon & Dragons master. Lastly, Simón feels obliged to mention that he is a staunch Real Madrid & Boca Junior aficionado.

DUBBZ DEVELOPMENTAL ROADMAP

-
1. PRE-LAUNCH PHASE
 2. LAUNCH PHASE
 3. POST-LAUNCH PHASE
 4. MARKETING-
ACHIEVING THE RIGHT BALANCE

1. PRE-LAUNCH PHASE

COMPLETE

2020-2022

Phase One took place over the course of two years, and saw the team's entire focus centred on bringing Dubbz from vision to reality.

MILESTONES

- Origination of Ideas
- Relevant Technology & Market Research
- Project Self-Funding
- Headhunting & Team Building
- Extensive Legal Consultation
- Website Development
- Smart Contract Development
- Cross-chain Bridge Development
- Decentralised Application Development
- Recruitment & Training of Platform Referees
- Auditing.
- Development of iOS and Android

2. LAUNCH PHASE

ONGOING

Q1, 2023

Phase two, the project's current Launch Phase, will breathe life into the project with its long-awaited introduction to the outside world and awaiting user base. All efforts will now centre on the rollout of the platform and the onboarding of users through various marketing campaigns in order to bring the platform to a massive audience. Phase Two is "the beginning of the starting line" for the Dubbz project.

MILESTONES

- Native Token Launch
- Wagering platform
- Dubbz Social Hub
- NFT Avatar System
- Referral System
- Revenue Distribution System
- Appeals & Dispute System
- Sponsored Tournaments & Partnership Announcements

3. POST-LAUNCH PHASE

2023 onwards

Renewed intense marketing campaigns, further community onboarding & reward programmes, potential CEX listings, and further project progression are to be expected post launch. Dubbz strives to continuously innovate the wagering process through utilizing OCR technology and by furthering partnerships with game developers so as to implement even deeper integration of games found on the platform. The Dubbz decentralized application (dApp) will position the project as the industry standard for developers to properly monetise their blockchain-based games, while also enabling studios to immediately introduce those games to a flourishing platform of users already comfortable with wagering, p2e, and blockchain-based gaming.

MILESTONES

- Stake-able tournaments
- Blockchain Gaming Portal.
- Community Growth
- Website Improvements (Bug Fixing & Content Updates)
- Ongoing Consultation of Legal Firms Regarding Utility Expansion
- Ongoing Auditing of Platform
- Partner Integrations
- Community Reward Schemes
- Social Media & Marketing Growth

4. MARKETING—ACHIEVING THE RIGHT BALANCE

Social media pushes, news outlet publications, community building, partnership growth, project-sponsored tournaments and NFTs, and so on will all be employed. Striking this correct balance between short-term and long-term interests is at the core of all projects.

We shall not be responsible for the accuracy or completeness of the Materials; therefore any use of such Materials is at your own discretion and risk, and you are solely responsible for any possible damages or losses arising from such use. You should always conduct your own independent research and investigation. Materials may also contain references to third-party data and industry publications. Although we believe that such data is accurate and reasonable, there are no assurances as to the accuracy or completeness of this data. We have not independently verified any of the data from third-party sources referred to on the Website or in connection with the Project, or ascertained the underlying assumptions relied upon by such sources. Any reference to such third-party data and industry publications does not imply our endorsement thereof.

The Dubbz Tokens

We do not make any warranties or representations of any kind with regard to the Dubbz Tokens, and we expressly disclaim all warranties and representations relating to the Dubbz Tokens, whether express or implied, including, without limitation, any implied warranties of merchantability, fitness for a particular purpose, title, and non-infringement. The Dubbz Tokens are provided on an «as is» and «as available» basis. There is no guarantee that the Dubbz Tokens will perform as expected or hold any particular value or price.

The DubbzTokens may lose some or all of their value. We do not make any promises with respect to the Dubbz Tokens, its price, value, supply amount, performance, etc. We cannot and do not influence the price of the Dubbz Tokens or its performance, and assume no liability to any person for the Dubbz Tokens, their performance, value or loss in value, the use or inability to use the Dubbz Tokens.

The Token is not an investment, security, share or equity interest, debt or loan nor a derivative instrument of any of the foregoing. Neither the Materials nor anything communicated or provided by us constitutes a prospectus or offering document, or is an offer to sell or solicitation of an offer to buy Dubbz Tokens or any other asset. Unless otherwise specified, the Dubbz Tokens do not provide any person with the rights of any type with respect to us or our affiliates, their revenues or assets, including, but not limited to, any voting, distribution, redemption, liquidation, proprietary or other financial or legal rights, nor are the Dubbz Tokens intended to provide any person with any other rights of any type.

The Dubbz Tokens are not a loan and do not provide any right of ownership or other interest. Unless expressly allowed by us at our discretion, Dubbz Tokens cannot be received, used, or held by, transferred or sold to, a person which is (i) the subject of economic or financial sanctions or trade embargoes administered or enforced by any country or government, including, but not limited to, those administered by the United Nations Security Council, the European Union, Her Majesty's Treasury of the United Kingdom or Office of Foreign Assets Control of the United States or any other applicable jurisdictions, (ii) located, organized or resident in any country or territory that is the subject of country-wide or territory-wide sanctions (including the "Prohibited Jurisdictions" defined in our Terms of Use Agreement), (iii) listed in any sanctions-related list of sanctioned persons, including, but not limited to, those maintained by the United Nations Security Council, the European Union, Her Majesty's Treasury of the United Kingdom or Office of Foreign Assets Control of the United States, (iv) located, organized or resident in Australia, Canada, Cuba, the Democratic People's Republic of North Korea, Hong Kong SAR, the Islamic Republic of Iran, Libya, the People's Republic of China, South Sudan, Sudan (North), Syria, The Crimea, and/or any jurisdiction in which the acquisition and/or ownership of Dubbz Tokens is prohibited by applicable law, or (v) directly or indirectly owned or controlled by any person or persons described above.

The Project is in its Initial Development Stage

The Project, while not owned, operated, developed or otherwise controlled by us, is in its initial development stage, which means that the Project and all related software are experimental. The Project is provided on an “as is” and “as available” basis, without warranty of any kind, either expressed or implied, including, without limitation, warranties that the Project is free of defects, vulnerabilities, merchantable, fit for a particular purpose or non-infringing. Any use of the Project shall be at your own risk. In no event shall we be held liable in connection with or for any claims, losses, damages or other liabilities, whether in contract, tort or otherwise, arising out of or in connection with the Project or its operation or use

Forward-Looking Statements

The Website, the Project, and the Materials may contain forward-looking statements based on current expectations that involve a number of risks and uncertainties. All opinions, forecasts, projections, future plans or other statements other than statements of historical fact, are forward-looking statements. Any development plans and projections, business projections, future functionality and projected performance of the Dubbz Tokens, the Project, or us, as well as prospects and the future prospects of any industry, are forward-looking statements.

Forward-looking statements by their nature address matters that are, to different degrees, uncertain or unknown. We can give no assurance that any forward-looking statements will prove to have been correct. Actual events, results or outcomes could differ materially from what is stated in the forward-looking statement, and you should not rely on any such forward-looking statement. These risks and uncertainties include the impact of economic, competitive, technical and other factors affecting the Dubbz Tokens, the Project, us, or our operations, including, but not limited to, the following: development of science and technology, development of the industry in which we are in, competition, regulatory uncertainty and government actions, the introduction of new regulations and laws, market changes, the performance of the Dubbz Tokens, the Project or related products, other business and market conditions.

No Advice

No part of the Website, the Project or the Materials should be considered to be business, legal, financial, investment, or tax advice, or advice of a broker regarding any matters to which all or any part of such information relates. You should consult your own legal, financial, tax, or other professional advisors regarding any such information.

Acceptance of Risks and No Liability

You must read the Risk Disclosure Statement below, and by accessing or using the Dubbz Tokens and/or the Project you accept all of the listed risks and agree that we shall not be in any way liable for any losses or damages incurred due to or in connection with such risks. You do hereby also acknowledge and agree that both the Dubbz Tokens and the Project may be subject to additional risk disclosure statements that may be amended from time to time.

Indemnity and Limitation of Liability

You do hereby to the fullest extent permitted by applicable laws and regulations indemnify, defend and hold us, our employees, directors, shareholders, officers, consultants, representatives, agents or contractors harmless from and against any and all loss, penalty, claim, damage, liability or expense whatsoever (including reasonable attorneys' fees and disbursements) due to or arising out of or based upon (i) any inaccurate representation or warranty made by you, or breach or failure by you to comply with any covenant or agreement made by you or in any other document furnished by you to any of the foregoing persons in connection with the Dubbz Tokens or the Project, or (ii) any action instituted by or on your behalf against any of the foregoing persons that is finally resolved by judgment against you or in favor of any of the foregoing persons.

To the maximum extent permitted by applicable laws and regulations, in no event shall us, our employees, directors, shareholders, officers, consultants, representatives, agents or contractors be liable or responsible for any direct, indirect, special, punitive, exemplary, incidental, or consequential damages or losses of any kind, nor shall they be liable for the loss of goodwill, loss of profits (including expected), loss of data, diminution of value, and business interruption arising out of or in connection with the use of the Dubbz Tokens, the Project or the Materials or reliance thereon, any inaccuracy or omission in any Materials, whether based upon breach of warranty or contract, negligence, strict liability, tort, or any other legal theory, regardless of whether we have been advised of the possibility of such damages or losses.

RISK DISCLOSURE STATEMENT

Risk of Software Weaknesses

Although we make reasonable efforts to ensure that the Dubbz Tokens, the Project and their related software follow the high-security standards, we do not warrant or represent that the Dubbz Tokens, the Project, or any such related software are secure or safe, or protected from phishing, malware or other malicious attacks. Further, the Dubbz Tokens, the Project and their related software may contain weaknesses, bugs, vulnerabilities, viruses or other defects which may have a material adverse effect on the operation of the Dubbz Tokens, the Project, or any such related software or may lead to losses and damages for you, other users of the Dubbz Tokens, the Project, or any such related software or third persons.

Risk Inherent in the Blockchain

The Dubbz Tokens, the Project and their related software are or will be deployed on the Ethereum blockchain main network, and later may be deployed on other blockchains. As a result, any malfunction, breakdown or abandonment of such blockchain(s) may have a material adverse effect on the Dubbz Tokens, the Project or such related software. Moreover, advances in cryptography, or technical advances such as the development quantum computing, could present risks to the Dubbz Tokens, the Project or such related software, and related blockchain software by rendering ineffective the cryptographic consensus mechanism that underpins the blockchain. The smart-contract concept, the underlying software application and software platform (i.e., Ethereum or other blockchain) are still in an early development stage and unproven. Although it is very unlikely, the blockchain, as well as any other blockchain, can be attacked which may result in downtime, consensus split, long reorganization of the chain, 51 percent attack, or other adverse outcomes each of which may lead to complete loss of your digital assets.

Risk of Flawed Logic of the Dubbz Tokens, the Project, or their Related Software

The underlying logic of the Dubbz Tokens, the Project, and their related software may be flawed, defective, or impaired, which can result in smart-contracts operating incorrectly or not as expected, or transactions being executed in violation of logic which underpins the smart-contracts, which can lead to partial or complete loss of digital assets used in the transaction.

Risk of Confusing User Interface

Certain user interface elements or design decisions can be confusing or mislead you, which may result in the execution of a different action or transaction than intended or desired, or connection of a wrong wallet, account or network.

Risk of Legal Uncertainty

Our intended activities are subject to various laws and regulations in the countries where we operate or intend to operate. We might be obliged to obtain different licenses or other permissive documents in some or all jurisdictions where we intend to operate our business, therefore, our business in such jurisdictions shall always be subject to obtaining such licenses or permissive documents, if so directed by applicable laws. There is a risk that certain activities may be deemed in violation of any such law or regulation. Penalties for any such potential violation would be unknown. Additionally, changes in applicable laws or regulations or evolving interpretations of existing law could, in certain circumstances, result in increased compliance costs or capital expenditures, which could affect our ability to carry on our business model.

Risk of Theft

There is no assurance that there will be no theft of your digital assets as a result of hacks, sophisticated cyber-attacks, distributed denials of service or errors, double-spent attacks, flash-loan attacks, vulnerabilities or defects of the Dubbz Tokens, the Project, or their related software or of the Ethereum or any other blockchain, or otherwise. Such events may include, for example, flaws in programming or source code leading to exploitation or abuse thereof. Any of the above may lead to partial or complete theft or loss of digital assets used in transactions carried out in connection with the Dubbz Tokens, the Project, or their related software.
